

Foreman Scaffolding

Do you have experience in conducting and managing scaffolding work in an industrial environment and are you looking for a job in the Netherlands? Then we are looking for you!

What are you going to do?

As a foreman scaffolding you take care of the execution and management of scaffolding work on site. You participate in the execution of the work and lead a group of scaffolders. You take the set preconditions and legislation into account, so that the work can be conducted safely. We expect our employees to follow the safety rules and use the personal protective equipment and tools with care. Safety is our number one priority!

What are you responsible for?

- Managing a group of scaffolders (incl. temporary workers) on site;
- Division of work among the scaffolders and giving instructions about the work to be done;
- Controlling safety, quality, productivity and responsibility.
- Independently performing all common scaffolding work;
- Communication about the progress of the work and deviations with the direct supervisor;
- Communication with the customer about the planning and execution of the work;
- Coaching and guidance of the technicians and support in case of problems.

What do you bring?

- Education in (mechanical) technology or engineering;
- At least 2 years of relevant work experience as a foreman;
- VCA (VOL) and other relevant courses;
- Command of the English language;
- Perseverance, drive and communication skills;
- A driver's license B.

What do we offer you?

- Salary according to collective labor agreement Metal and Technology. Insulation company;
- Variable bonus of 10%;
- 25 vacation days;
- 13 ADV days;
- Training and development opportunities;
- Personnel fund;
- Participation in Pension Fund PMT;
- A pleasant and motivated team.
