Shiji Job Ads

COMPANY DESCRIPTION

Shiji Group is a major software supplier in the hospitality and retail industries. Developing worldwide leading products and technologies, aimed at the international market and speeding up its globalization progress. Our team of more than 5,000 talented employees, in 70+ subsidiaries worldwide, is constantly adapting to facilitate the transition to fully integrated systems for our clients through a network of secure, scalable, and ready for the future platforms, so clients can focus on their core competencies of serving their customer and guests.

Concept, a Shiji Group Brand, is a global hospitality technology provider specializing in solutions for the Golf, Spa, and Leisure markets. With over 25 years of experience, and installations in 58 countries, Concept has developed a comprehensive reservation management product that includes solutions to manage every aspect of a Golf, Spa, or Leisure operation. Today, Concept has software available in 15 different languages, and a global support network to match.

Concept's commitment to existing and new customers means that our software solutions are continuously developed and enhanced to add new features and functionality based on the requirements of many of the world's leading hotels, clubs and resorts. Concept's open approach to development and integration of products enables every customer deployment to be tailored to their exact requirements. Our 24/7 global support and training network also gives each customer piece of mind.

To support our Development team in Portugal, we're looking for a motivated and skilled **Back-End Developer** to create a web-based solution for reservation management software for the leisure industry.
