

COMPANY DESCRIPTION

Shiji Group is a major software supplier in the hospitality and retail industries. Developing worldwide leading products and technologies, aimed at the international market and speeding up its globalization progress. Our team of more than 5,000 talented employees, in 70+ subsidiaries worldwide, is constantly adapting to facilitate the transition to fully integrated systems for our clients through a network of secure, scalable, and ready for the future platforms, so clients can focus on their core competencies of serving their customer and guests.

Concept, a Shiji Group Brand, is a global hospitality technology provider specializing in solutions for the Golf, Spa, and Leisure markets. With over 25 years of experience, and installations in 58 countries, Concept has developed a comprehensive reservation management product that includes solutions to manage every aspect of a Golf, Spa, or Leisure operation. Today, Concept has software available in 15 different languages, and a global support network to match.

Concept's commitment to existing and new customers means that our software solutions are continuously developed and enhanced to add new features and functionality based on the requirements of many of the world's leading hotels, clubs and resorts. Concept's open approach to development and integration of products enables every customer deployment to be tailored to their exact requirements. Our 24/7 global support and training network also gives each customer piece of mind.

To support our Development team in Portugal, we're looking for a motivated and skilled **Front-End Developer** to create a web-based solution for reservation management software for the leisure industry.

WHAT YOU WILL DO

- Design and develop software features based on visual mockups and user stories
- Deliver high quality code, which is both functional and performant, while working and communicating in a SCRUM team environment
- SOLID understanding of best practices, processes and patterns in software development

- Contribute to the infrastructure that the team leverages for development
- To perform code review
- You may be asked to lead or mentor other team members

WHAT ARE WE LOOKING FOR

- Minimum 2 years of previous experience as JavaScript developer
- Advanced understanding of JavaScript
- General awareness of web application performance best practices
- You have worked with or contributed to a JavaScript based build system (e.g. Babel, Webpack, Grunt/Gulp)
- Previous experience with one or more JavaScript frameworks (Ember, Angular, Backbone)
- HTML5, CSS3, Typescript and LESS/Sass don't scare you
- You are familiar with CSS frameworks (Bootstrap / Compass)
- Interest in testing, review and code quality
- Excellent verbal and written communications skills in English are essential

Nice to Have:

- You have worked with or contributed to a JavaScript based build system (e.g. Babel, Webpack, Grunt/Gulp)

WHAT WE OFFER

- Challenging and creative technology environment with a great deal of freedom and responsibility
- Feedback and initiatives are always welcomed, you'll also get full ownership to help shape the company's future
- Opportunity to grow inside the global organization and develop yourself both professionally and personally
- Flexible working hours or opportunity to work partially remotely
- A modern workplace in one of our multinational offices, of course as much coffee and mate as you need to get into the flow
- Regular company Events & Entertainments as well as access to various location-based benefits and Employee Assistance Programs

Team related **NON-MATERIAL** benefits:

- work in an agile team of IT professionals

WHAT YOU HAVE TO KNOW

- Please note that Shiji does not provide work permit sponsorship for this position
- This position is offered in Faro, Algarve - Portugal

INTERESTED?

Looking forward to your application under the specification of your possible starting date and salary expectations.

Please don't forget to put the clauses you accept in your resume:
