

Sumi Smart & Connected Buildings

www.sumismart.com

one of the leading independent digital building integrator companies in Belgium. Many railway stations, government buildings, industry buildings, hotels, universities, schools, hospitals, concert halls, etc. are operating in better sustainable way thanks to the contribution of the Sumi-team. We are a one-stop B-to-B-desk for big technical contractors and public and private real estate owners. We help them with all necessary hard- and smartware, engineering, programming, commissioning, maintenance and optimization services. We work with some of the best worldwide digital building partners and complement their tools with hands-on user friendly solutions developed by our own R&D engineers. Our market-leading digital multi-site SHOPCONTROLLER-Platform is optimizing the hundreds of installations of many of the most important retailers and food-retailers and of 550 stations of the Belgian Railways NMBS/SNCB. www.shopcontroller.be

To strengthen our BMS/HVAC team we are reaching out for a

Senior Building Automation Engineer - HVAC

Programming, Configuration, Service

Role :

Co-operate in a multidisciplinary team of automation engineers to realize important and fascinating projects with national and international appearance.

Our team is programming, parameterizing, and commissioning **Building Management Systems** like *EcoStruXure, Desigo* etc and linking them with the **HVAC/Elec/Fire/Security/etc controls** through protocols like **BACNet, Modbus, KNX, DALI, M-Bus, MQTT**, etc, We conceive graphical User Interfaces and link them with IP, IoT, network-environments and databases.

In this job you will focus on projects where you realize a performing automation for HVAC that is needlessly linked with the overlaying Digital Building Platform. You 'll work in our offices, from home, and of course, in the buildings of our customers.

You are ready to meet productivity targets, keep error margins under control and to consider problem solving as a challenge as not as a threat.

General competences :

Flexible and polyvalent personality with minimal **3 years of proven track record** in building automation programming.

Programming and HVAC our components of your DNA, digital buildings are one of your passions. Efficient in communication, internally and externally. Good insight in the organization of the construction process with all the actors that are concerned.

Dynamic SME-team-spirit. Professionalism and focus on result and customer satisfaction. Humor is a necessity..

Knowledge

Bachelor (or equivalent through exoerience) or Master in digital or smart building, (building) automation, energy technology, measure&control technology, HVAC, Cooling, Electro-technics, Electro-mechanics, of equivalent Knowledge and experience with HVAC-regulation is key. Experience with different building automation protocols, networks, IoT, other control systems is useful. . We are not looking for a superman, but if you can offer proven experience in some of the key competences, and you are a strong performer, we'll take you up to another level.

Offer

High Salary for high performance. Company Car. Attractive extra-legal advantages. Mutual flexibility. Send your CV and your motivation today to stef@sumismart.com
