Job location: Klaipeda district

VLANTANA

Vlantana, one of the largest Lithuanian logistics companies within 2,500 employees and fleet of more than 1,550 trucks, specializes in FTL transportation throughout the European Union and the CIS countries.

International company with 25 years of experience solves the customers' logistics and transportation needs in the industrial, commercial and consumer supply chain.

In order to be a leader in logistics innovation, providing the highest quality and unique customer service, being an inspiring and responsible employer for society and the environment, the company is guided by the following values: innovation, leadership, responsibility, respectfulness and agility.

Job description:
• Support and expansion of the company's internal business management systems;
• Work with Big Data, telematics data processing, life-inspiring modules of legacy systems and optimization of MySQL / T-SQL queries;
• Work on the principle of "Rapid Deployment".

Requirements:
• PHP7, MySQL, HTML5/CSS3/JS;
• Be able to work in a team;
• At least 1 year of experience;
• Work with PHP Frameworks (Laravel, Symfony, CodeIgniter, CakePHP, etc.).

Advantages:
• Experience with VCS;
• Knowledge of Unit testing
• Working experience with IntelliJ IDE;
• Communication and collaboration;
• Driver's license (we are a little far from the city).

We offer:
• Challenging and unusual situations;
• Opportunity to improve knowledge and qualification;
• Motivating salary based on work results;
• Regular recreational trips with the IT team;
• 1750 – 2980 Eur/month before tax.
