

Role: (Junior) Maintenance Engineer
Location: Ochten the Netherlands

Our client started developing and producing healthy juices 8 years ago. Due to the growing popularity for healthy food, this company has grown into an international company with around 300 employees in a very short time.

Due to this large growth, the production location is constantly changing. Work is being done every day to increase and improve production facilities. This provides new challenges on a technical and organizational level on a daily basis.

The technical department consisting of approximately 13 people and is therefore also very flexible. A lot is expected from the technical department to be able to keep up with the large growth in technical terms. Tasks include devising production-enhancing solutions, commissioning and malfunction and maintenance.

The job

As an Allround Maintenance Engineer you are responsible for:

- Maintaining, revising and modifying: filling machines, labelling machines, peeling machines, mixing machines and pressing machines
- You will also be trained over time as a specialist in the High Pressure Process (HPP)
- You deal with mechanical and electrical failures
- You are involved in modifying and improving the production process

Your profile

- You have a level 7 or 8 degree in Mechanical, Electrical or Mechatronics
- You have mechanical and electrical knowledge
- You enjoy working in a young team
- Due to the rapid growth it can be hectic from time to time, you know how to deal with this
- You are willing to work in 3-shifts
- Do you have experience with cooling technology? Then this is an advantage

What do we offer?

- 
- A salary between €35K - €40K a year, including shift allowance
 - Because you come to work for a young and fast-growing company, there are more than enough opportunities to grow
 - Lots of technical challenges
 - Opportunities to follow several trainings
