DYNAMIC CAPABILITIES WORKFORCE

Fravizel

ESG

Fravizel develops and manufacture sustainable innovations

1. We encourage good work conditions, safety, and technological developments that are attractive for our clients and their employees (**social sustainability**).
2. We recognize innovation as a lever for the improvement of time and productivity management (**economic sustainability**).
1. We promote and advocate the circular economy and hybrid technology (**environmental sustainability**).

ESG

We promote technology that develops:

Economic Viability

Digitization and Integration of Data

Safety and Maintenance

Improvements in Energy Efficiency

Social Responsibility

Training for Human Resources

TWIN TRANSITION

- I. Carbon Neutrality**
- II. Digital Technology**

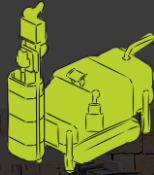

All eyes should be on this

Automation

Innovation

Digital
Technology

“The digitization of the economy and various dimensions of everyday life, along with the development of automation, robotization, artificial intelligence and the Internet of things (IoT), has impacts not only in terms of the number of jobs available in the future, but also in **the quality and nature of the work**; in the organization of processes of production; in the contents, tasks and functions performed and in the competences that are required.”

Green Book on the Future of Work,
2021, p. 16

THANK YOU!
