## **DUTIES AND RESPONSIBILITIES**

- **Requirements Analysis:** The Mobile App Developer works with the Product Owner to understand the application needs and define functional and non-functional requirements.
- **User interface design:** Create the user interface design of the application, considering usability best practices and user experience.
- **Application development:** Use cross-platform frameworks like Xamarin, .net Maui or Flutter.
- **Service integration:** Collaborate with back-end teams to integrate mobile applications with back-end services, such as databases and APIs.
- **Testing and debugging:** Performs tests to ensure the application works properly and fixes any bugs or performance issues.
- **Release and publication:** Prepare the application for release on the respective app store, following platform-specific guidelines and publishing processes.
- **Stay up to date on new technology trends**

## **HARD SKILLS**

- **Knowledge of programming languages:** Excellent command of languages like C# or Dart.
- **Knowledge of frameworks and libraries:** Experience with frameworks such as Flutter, Xamarin or .net Maui for cross-platform app development.
- **Knowledge of mobile platforms:** Familiar with major mobile platforms, such as Android and iOS, including their respective SDKs and development tools.
- **UI/UX design skills:** Skills in designing an intuitive and engaging user interface, taking into account the design guidelines of the platforms.
- **Understanding security concepts:** Understand best practices to ensure the security of mobile applications and the protection of sensitive data.
- **Problem-solving and debugging:** Ability to identify and fix problems and bugs in the application code.
- **Xcode:** IDE for iOS app development, which provides an integrated environment for code writing, debugging, and user interface creation.

- Flutter: Open-source framework for developing native apps for Android, iOS, web and desktop, with a single code base.
- Firebase: Google's mobile app development platform, offering a wide range of services, including authentication, real-time databases, push notifications, and more.
- App Store Connect and Google Play Console: Tools for the release and management of apps on the respective app stores.

## MAIN AND COMPLEMENTARY CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate: Certification that demonstrates expertise in developing cloud apps using Microsoft Azure as a hosting platform and services.
- Flutter Certified Application Developer: Certification that demonstrates skills in developing cross-platform mobile apps using the Flutter framework.

## SOFT SKILLS

- Organizational and planning skills.
- Ability to work in agile teams
- Communicative and relational skills
- Attitude to problem solving.
